Digital instructions are available on the product page.

Discovery 1 & 2 Ditch Light Brackets

Tips:

- Install one side at a time, so that the hood stays in place.
- Be sure to identify the left and right sides using this image.
- It may be easier to mount the light loosely onto the bracket before mounting the bracket to the vehicle.

Remove the two bolts holding the hood to the hinge bracket

Place the ditch light bracket sandwiched between the hood and the hinge bracket as shown. Thread in the bolts.

Tighten down the bolts. Pay attention to the marks so you can re-align the hood as it was before.

Done! Now mount your favorite pod light.
