## Discovery, Series I, and Range Rover Classic Sills

Recommended Fitting Sequence for Discovery Sills:

1. Remove plastic sills.
2. Place new sill into position and jack up tight into position, ensuring caps are level front and rear.
3. Drill through the existing sill holes, creating a hole on the inside of the box section. This allows the bolts provided to pass through the boxed section to be attached to the nuts provided.
4. Using compression spacers as shown (steel tube), fit bolts, then fit self tappers to front fender.

## TOOLS/PARTS

Tools:	10mm Drill Bit	
	13mm Socket
